

# HOW DOES IT WORK?

1. Find your child and make sure they're wearing a pair of socks.
2. Make sure your child's foot is positioned along the "Heel Goes Here" black line.
3. Then, measure the right foot and the left foot. Red lines indicate half sizes.
4. If one foot is larger than the other or in the middle of two sizes, always purchase the larger size.
5. You did it! You can now purchase and enjoy your child's new favorite pair of shoes!

If you have any further questions, feel free to contact your nearest **SCHEELS** location to speak with a Fitting Expert.
